

■ Engineered for the world's toughest places.

Western Spring and Wire has been a major supplier of oil patch springs to the producers of oil and gas in Canada for almost thirty years. Providing oil patch springs to this industry has helped us keep up with the rapid advances in metallurgy and the need for manufacturing quality. Producing springs to this specialized industry that can withstand the most demanding and harsh conditions has made us experts in the design and production of springs and wire components. Many depend on the gas and oil industry, and therefore our oil patch springs are of the highest quality and durability.
